What is SmartCash

SmartCash is an easy to use, fast, and secure cryptocurrency that supports everyday use such as business payments and in person transactions. SmartCash is meant to be a currency, and our vision is to replace centralized fiat currencies in day to day life. SmartCash is a cryptocurrency with its own blockchain based on modified Bitcoin base code.

You can find out more at

OUR FEATURES

SMARTHIVE

The idea is that the SmartHive Governance Portal engages community members and other 3rd parties interested in growing SmartCash into a global currency. Each SmartCash holder can create a proposal, everyone can vote.

1 SMART = 1 VOTE

SMARTCARD

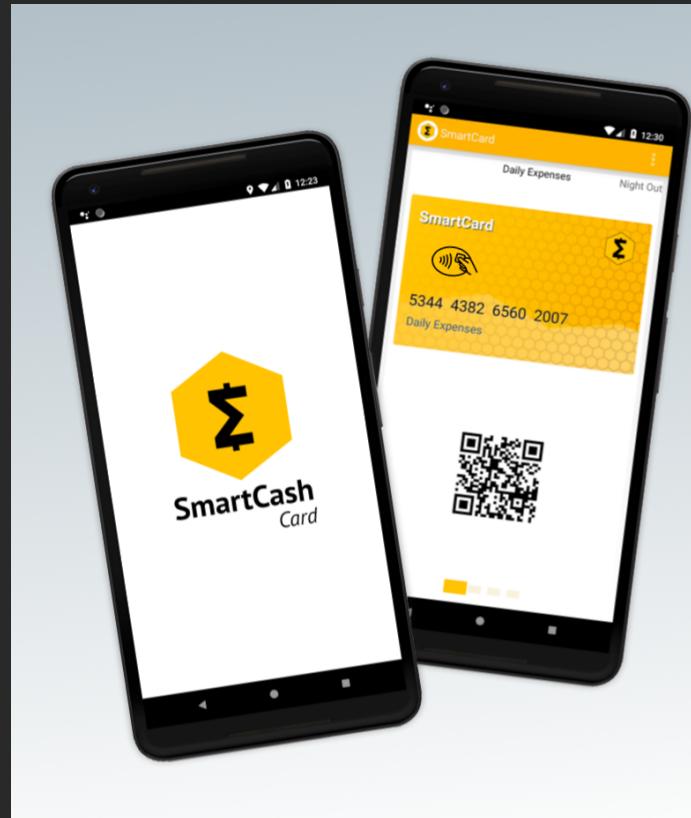

SmartCard is a physical card that allows both storing and spending your SmartCash on a daily basis. Your SmartCard works without an internet connection and all transactions use InstantPay by default.

INSTANT PAY

Allows instant point-of-sale in-store and online purchases. Transactions are locked to sender in seconds by the SmartNode network.

SMARTREWARDS

SmartRewards are a method of distributing block rewards among SmartCash addresses. This allows for a more decentralized creation of block rewards.

SMARTBAND

The SmartBand is a partnership between Stratum, ATAR, and SmartCash. ATAR launched a wristband which is linked to an account where people in Brazil can deposit fiat and pay with it for their daily needs using NFC technology built in the band at over 2.5 million merchants.

SEND BY SMS & EMAIL

Send SmartCash in 3 simple steps, auto-return your SmartCash after seven days if not claimed, and no login/account required for Sending.

BENEFITS OF ACCEPTING SMARTCASH FOR MERCHANTS

-  **NO PROCESSING FEES**
-  **FAST TRANSACTIONS**
-  **NO RESTRICTIONS**
-  **CUSTOMER PRIVACY**
